## **Introducing magical tunings**

When researching, composing, recording, and performing music I often think of how much more our current civilisation would be advanced, enlightened, and progressed if we were to fully harness the power of vibrational tunings that the ancients once were known to possess. But these secrets are now returning to us once more.

Currently most musicians in the world tune to 440hz. But in reality the secrets behind some of the worlds greatest marvels, and a source of energy and power beyond imagination lies behind tuning into the resonance of nature which is more in sync with the A=432hz tuning system. Backed by soul, emotion, feeling and the will of the performer, these forgotten tunings can seemingly work miracles. And this is where our magical musical journey begins.

Just as the secrets of the ancient textile artisans was to create portals and doorways to other realms in their fabrics and magic carpets. Musicians can also open doorways to other places by utilising tunings with magical properties and layering beautiful notes played with emotion, intention and feeling.

This story can be used to unlock many secrets and taken forward with further work from other musicians, healers, mystics and inventors. This journey for me has been a journey of remembering, as it feels like I'm remembering an ancient past, and other lives that have culminated to present to you this research.

Right now many of us are remembering what the ancients knew, as maybe the secrets line our DNA memories of what we were once capable of, and also of where we are heading in the evolution of humankind. With each step of learning, practice, and remembering a new key appears to piece together the puzzle of magical tunings and how they relate to nature and all that is of the universe we are a part of.

In the coming pages we will explore the history of the magical tuning of A=432hz, and how it relates to nature and everything we know of at its core level. We will cover how this tuning is in perfect harmony with the human body, nature's laws, and how they shape reality around us at its core level. We will look at how these tunings can give one access to portals to other dimensions and act as doorways to the spirit realm.

We will also be exploring what is possible with alternate tunings and resonance frequencies. The endless possibilities from aiding in healing the body, to levitating objects like the enormous pyramid stones in Egypt, and the megalithic structures of ancient Sumer. Music shapes our lives and our memories are often associated with songs we listened to of that time. You will now learn the infinite potential power that can be yielded by harnessing the magical tuning of A=432hz.

I believe that the secret key to assisting the body to heal and alleviate pain is contained in vibrational tunings, as everything at its core level is vibration.

In this book you will see the symbol of "hz" written straight after a set of numbers, for example 432hz. The hz stands for Hertz which is a method of measuring an accurate tuning. Hertz reflects cycles per second of a note vibration to reach a certain pitch. So if it is an A string of a guitar tuned to 432hz the correct tuning could be measured and replicated by the notes vibration at 432 cycles per second.

So whereas Hz or hertz is cycles per second, kHz or Kilohertz is measured as thousands of cycles per second. For example 9Khz is 9,000 cycles per second. Most humans can consciously experience sound at ranges between 20Hz and 20kHz. However lower and higher frequencies can also have powerful effects on ourselves and our environment, we just cannot consciously recognise or hear them as sound.

## The history of magical tunings

Physicists are now re-discovering what the ancients once knew, that at its core everything is made up of resonance and vibration.

Nikola Tesla is said to have asked this question about all light that emits from sunlight to a small candle: ‘What, then, can light be if it is not a transverse vibration?’  
Asked Tesla.

Here is the answer he found after focusing on what light really is:

“I consider this extremely important, light cannot be anything else but a longitudinal disturbance in the aether, involving alternate compressions and rarefactions. In other words, light can be nothing else than a sound wave in the aether.”

In the 1940’s the world standard for musical concert pitch was made to 440hz. Our standard tunings in the modern world I have found not only to be at direct odds to nature. But also to be detrimental to both our health and our sanity. And also a block to our evolution as a species.

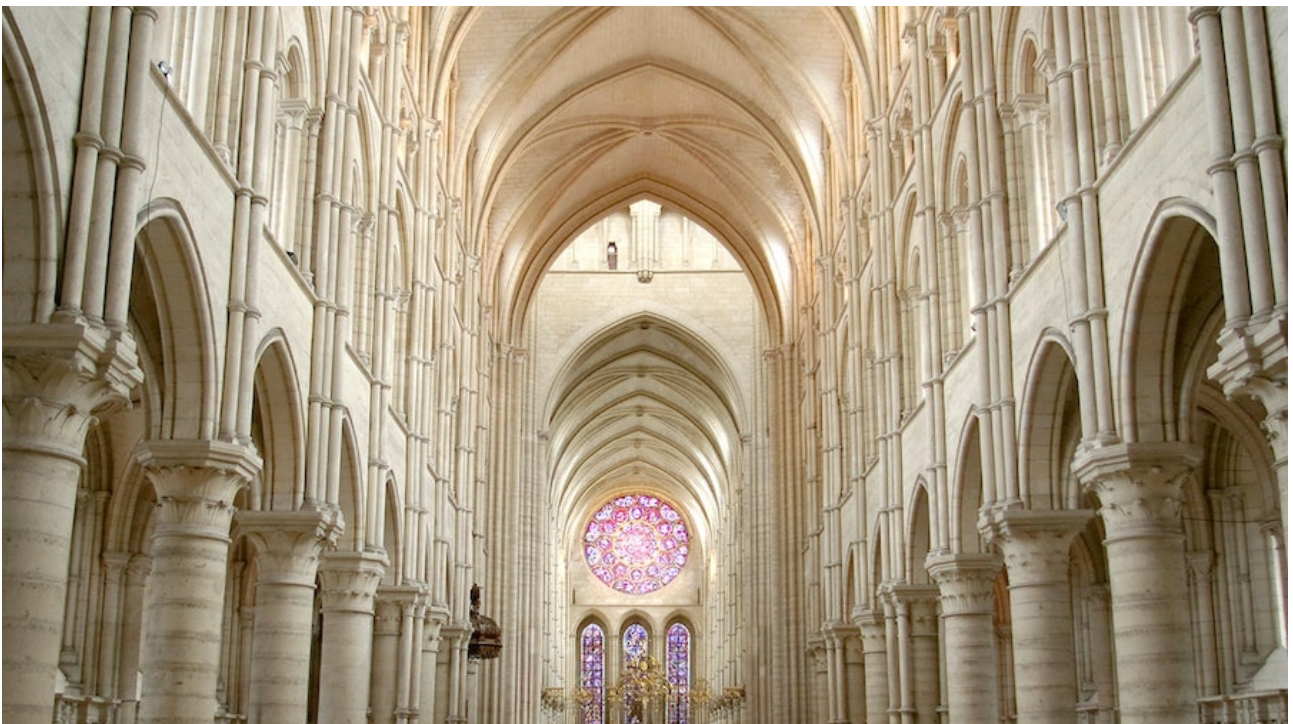

Since I have re-discovered these magic vibrational tunings for myself I have recorded albums and extensively tested the effects of the alternative 432hz tuning on hundreds of thousands of people over the last decade by performing in the streets of busy towns throughout Australia.

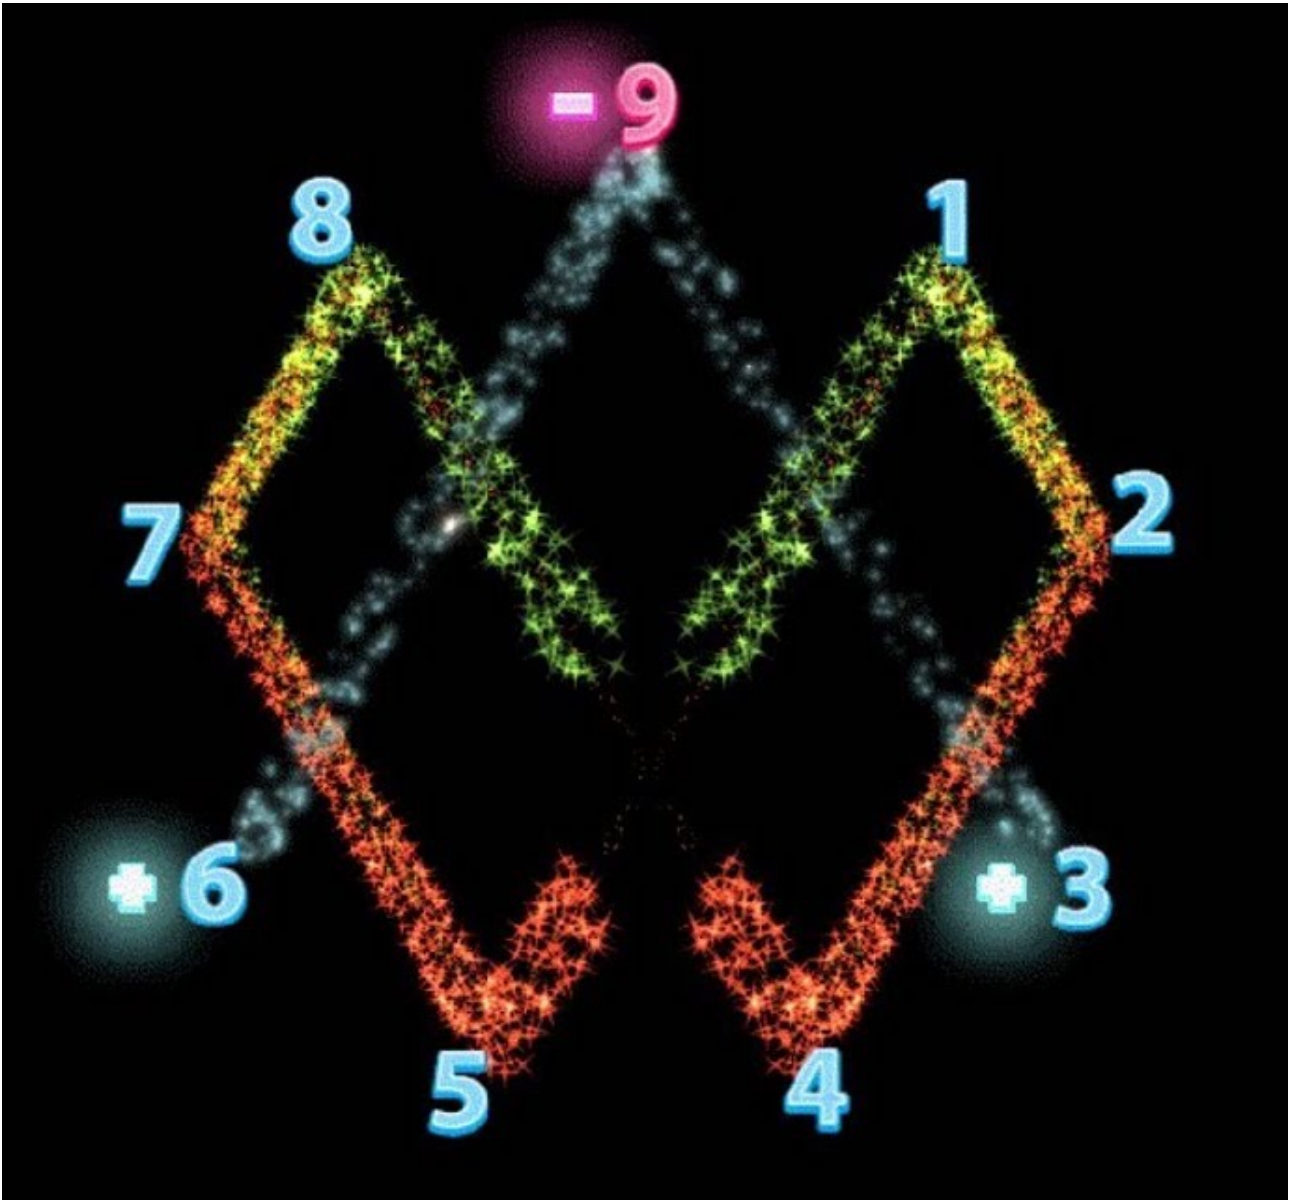

And the results as you will find out in the coming pages have been absolutely mind blowing!

The Sumerians and other ancient civilisations knew about magical tunings many thousands of years ago and they used them in levitation, core drilling diamond granite, and cutting the most solid rocks like a knife through butter.

Ancient sound resonance chambers have been found to treat diseases like cancer. And many monuments around the world once thought to be tombs and coliseums are now revealing themselves to being giant sound resonance devices.

A church is a more obvious example of a large sound resonance device. People gather in the church they sing and pray, and callout to Gods with great emotion. And the sound travels up as its power is focused and directed by the pointed resonance chamber and the vaulted ceilings.

## The secret power of the number 9

Most of us are taught in school the counting properties of numbers alone, but very few know the true potential power of them. Numbers also have astrological, etheric, energetic, dimensional, and manifestation properties.

And of the numbers, 9 is the most powerful number of all. Of the single digit numbers only 3, 6 and 9 are spirit numbers. 3 being male spirit, 6 being female spirit, and 9 being the centre point of source.

Nikola Tesla harnessed the secret powers of the numbers 3, 6 and 9.

Tesla had over 200 amazing patents on all sorts of technology. During his time he was often known to have spoken about the power of 3, 6 and 9. Tesla had based much of his work and life around these numbers.

3 and 6 are container numbers, they give the shape of an object no matter how large or small, and 9 is the direct centre axis.

9 is the centre point axis of the torus energy field, a powerful magnetic, zero-point energy field that surrounds planets, human beings, and also things as small as the atom. The number 9 is also directly related to nature and our chakras in musical tunings.

9 is everything and nothing

9 is the point of creation

9 is spirit

9 is source

Vortex math is the key to seeing the way the number 9 is so special and realising it's magical properties and how it relates to the golden ratio. Put simply the way vortex math works is that any number higher than 9 is reduced to a single digit number by adding them together.

So let's look at some of the sums of all angles that make up the shapes of our reality to see the significance of 9, and how it relates to vortex math:

180 degrees is a triangle  $1+8+0 = 9$

360 degrees in a circle  $3+6+0 = 9$  - the circle makes up the flower of life

360 degrees is also a quadrilateral

540 degrees is a Pentagon  $5+4+0 = 9$

720 degrees is hexagon  $7+2+0 = 9$

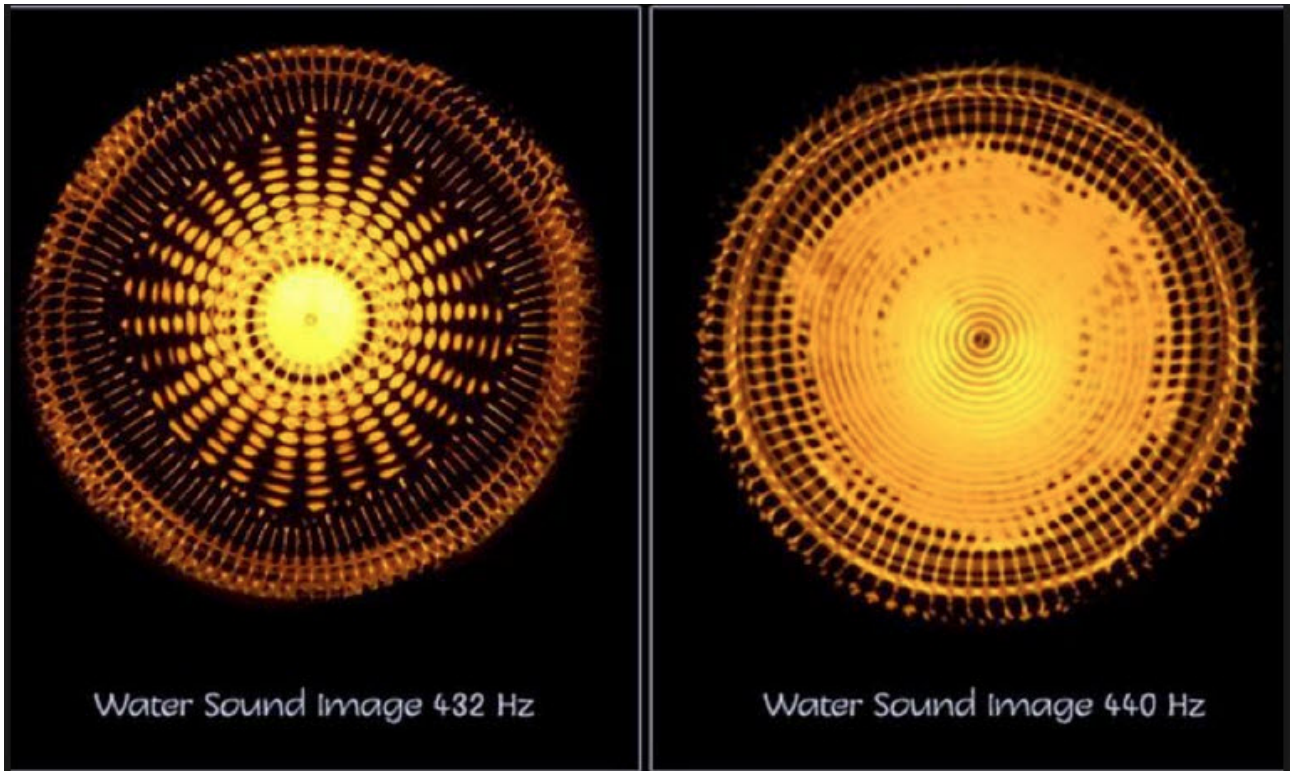

900 degrees is a heptagon  $9+0+0 = 9$

1080 degrees is an octagon  $1+0+8+0 = 9$

1260 degrees is a nonagon  $1+2+6+0 = 9$

1440 degrees is a decagon  $1+4+4+0 = 9$

Are you beginning to see the importance of number 9?

## 432 is 9

$$432\text{hz} - 4+3+2=9$$

9

is spirit

the centre of a vortex

everything and nothing

To tune to 432hz is around half a semitone, or approximately a quarter tone lower than the world standard 440hz tuning. For instruments there are tuners available that have a dial where you can change the hz (hertz). 432 as a number is in direct harmony in alignment with the Golden ratio.

The tuning of 432hz is nature's number of creation, number nine, everything and nothing. From a place of nothing is where all music and art comes.

Here are the octaves below 432hz:

216hz – 1 octaves below A= 432hz

108hz – 2 octaves below A= 432hz

54hz – 3 octaves below A= 432hz

27hz – 4 octaves below A= 432hz

216hz  $2+1+6=9$

108hz  $1+0+8=9$

54hz  $5+4=9$

27hz.  $2+7=9$

They all are 9!

This pattern repeats itself in all octaves above A=432hz as well.

432hz was used by Mozart the Italian opera composer and also Giuseppe Fortunino Francesco Verdi. Verdi preferred his composition Requiem in 432hz, and once wrote to the Congress of Italian Musicians to suggest they adopt 432hz as the concert standard.

There however will be no claims in this book of any other artists to have used 432hz tuning. In fact every artist that I have heard claims by others that they have tuned to A = 432hz, in actuality tuned to 440hz, or one semitone flat in every example I have been cited to date.

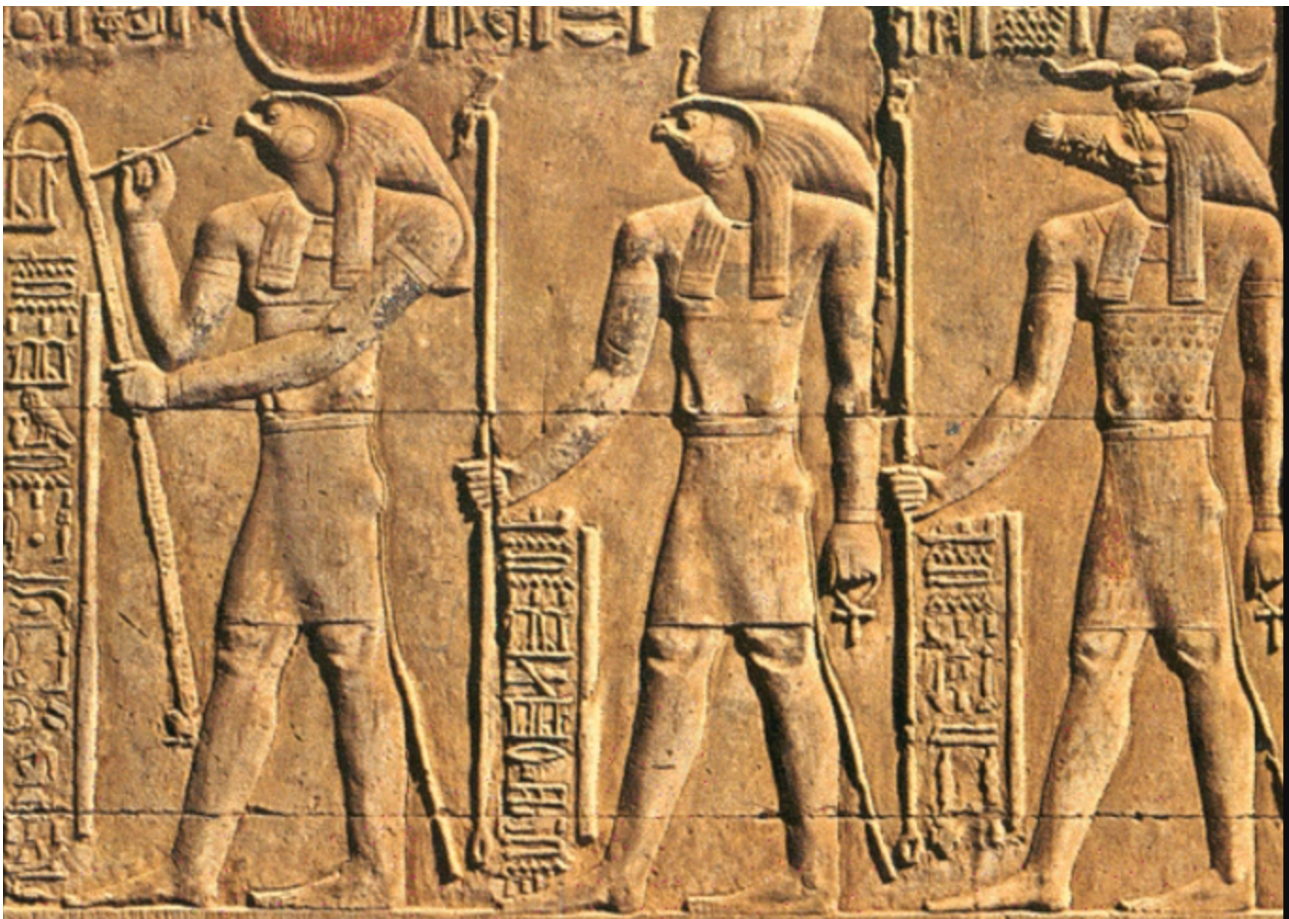

In the 1940's 440hz was introduced as the world standard, and the majority of music has been recorded in 440hz tuning ever since.

## The tunings of the seven chakras

432hz is also the one consistent tuning that I believe best aligns with the chakras. Here are the direct tunings in 432hz in relation to each of the seven major chakras.

Crown - B  
Third eye - A  
Throat - G  
Heart - F#  
Solar plexus - E  
Sacral - D  
Root - C

## **Sympathetic resonance frequency**

Resonance is when one object vibrating at the same natural frequency of a second object forces that second object into vibrational motion. The word resonance comes from Latin and means to "resound" or to sound out together.

Sympathetic resonance frequency is used to describe situations like the striking of one tuning fork can set off the vibration and note sound of another tuning fork tuned to the same note.

The tunings forks are connected and entangled and have sympathetic resonance across the room when the other is struck. Just as this is the case giant structures that have been built by men, like bridges that have fallen into rivers from the sounding of sympathetic resonance frequency of a natural note.

The note may have been produced by a natural occurrence like the wind tuning into some core structural integrity of the bridge and increasing the vibration of that bridge until rivets pop out, the metal twists and it collapses.

Just as the wind can tune into steel to twist bend and even collapse a bridge, all forms of matter from steel and stone to living organisms have sympathetic resonance frequencies.

A viable answer as to how the pyramids were built, if they were built from the top capstone down is levitation using sympathetic resonance frequency. And evidence is now showing itself that amazing core drills and the carving of stone tablets as old as 6000 years that were melted like butter using sympathetic resonance frequencies.

If the smaller tuning fork is in the same tuning as the larger tuning fork. This sets off a sympathetic resonance trigger that is of the correct sympathetic resonance frequency for the stone. Then the larger tuning fork implement could have a sympathetic resonance vibration of the right tuning to even melt into the toughest diamond granite like butter.

Blades or drills will have very minimal wear as there is practically no friction when the sympathetic resonance frequency is correct to the material you are cutting into.

Cancer cells are vulnerable to destruction at sympathetic resonance frequencies of 100,000hz to 300,000hz. Plasma antennas have been used to act as the transmission source of these sympathetic resonance frequencies. A treatment such as this may also be combined with the feel good, and life force raising vibrations of music tuned to 432hz to assist in healing and recovery.

Have you heard the story of the father who is about to pass away and his daughter went to visit him in hospice care?

His daughter was told he was about to pass away so she decided to go visit him to spend his final days with him. When she arrived she found a nurse was singing his favourite song and his face lit up and the colour had come back to his face, and his life force energy seemed to return. Within days he walked out of the hospital.

## **Sleep, healing and 432hz**

Soon after the release the album 17 songs in 432hz I was touring and street performing up through the eastern coast of Queensland Australia.

I arrived in a town called Gladstone and set up my busking rig and began to play outside the local shopping centre.

A man came and sat for most of my set listening intently.

After I had finished performing my guitar instrumentals he purchased my album. A few weeks later I receive a message from the same man opening with “ You know Robbie, my girlfriends not gonna leave me any more! For years I have not been able to sleep the night, I pace the house walking around in circles chain smoking. My girlfriend was going to leave me, but she’s not now!”

He proceeded to tell me he went home and put the CD on that night. It was the first night in a long long time that he has slept through with a good solid eight hours sleep.

And he was able to sleep well, and enjoy a full nights sleep from then on by using my album 17 songs in 432hz. Plus his girlfriend was no longer going to leave him for keeping her awake!

It was then that I began to come to grasp the potential power of this tuning.

Since that day I have had many similar incidents.

A lady approached me with her daughter one afternoon in Townsville and with a tear in her eye she told me how she just been diagnosed with cancer. She told me that when she heard my music from a distance a voice inside said that it would help heal her.

In Victoria another woman said to me she was listening to my guitar music from her car for about 30 minutes and felt it really helped her symptoms, as she was diagnosed as bi-polar. She was so calm and said confidently to me that she felt sure that listening to this tuning of music would help her.

An intuitive healer on the Gold Coast reports that sleeping to my 432hz music takes him 3 dimensions higher. Then he stays in that level throughout the night whilst dreaming.

## **The guitar was modelled on the spine**

The original guitars and lutes were modelled on the spine. Each vertebrae of the spine has a specific tuning.

For practitioners involved in the recovery and healing of spinal injuries and diseases of the spine this could be most beneficial in aiding in their patient treatments. By playing music or resonance frequencies corresponding to the injured or diseased area could have dramatic effect on healing and strengthening the spine.

The sense of shivers up ones spine when listening to pleasurable music is evidence of this and is termed “frisson”.

The separate bones of the spine can be tuned into by using correct resonance frequencies and this procedure could be used along with chiropractic procedures and plants such as turmeric and pepper externally applied to aid in recovery, and to help straighten and retune the spine and to repair nerve damage.

## **Exploring what is possible**

Magical tunings can be used for many practical applications, as well as healing. When one understands that everything is vibration at its core level, one can then begin to use the correct frequencies to tune into just about anything you so desire.

You can tune into love, health, happiness, prosperity anytime, the choice is yours.

Let's explore how resonance frequencies can be harnessed and directed, and some of the amazing possibilities that are available for health, technology, and the environment.

There are so many possible applications and endless problems that can be solved by mastering resonance frequencies. From zero point or free energy applications, to upgrades to our DNA and cognitive abilities, and also answers to environmental problems, including both man-made and natural disasters.

Sound creates light, and sonoluminescence is a way to turn sound energy into light. When intense sound waves are created in a flask of water, a tiny air bubble in the water can give off flashes of light.

- Sound can also levitate objects
- Sound can boil water
- Sound can create, alter, and activate DNA
- Sound can heal and destroys pathogens
- Sound can travel beyond the speed of light - Hypersound and SASER technology
- Sound can make things invisible
- Sound can energise water and purify the air we breathe
- Sound is also the precursor to electromagnetism

## Energy applications

Hertz as units can be used as a representation of energy, via the photon energy equation ( $E=h\nu$ ), with one hertz equivalent to  $h$  joules.

A joule is energy dissipated as heat when an electric current of one ampere passes through a resistance of one ohm for one second.

A joule is also the work required to produce one watt of power for one second, or one watt-second ( $W \cdot s$ )

A kilowatt-hour = 3.6 megajoules

This relationship can be used to define the watt.

You may have heard of the use of high frequency energy weapons used by the Navy. The destruction these weapons cause is an extreme example of the potential power of hertz frequency.

So just as hertz can be used as a way of measuring power, certain number sequences in tuning will produce more power.

The three most important numbers in nature are 3, 6 & 9.

432hz  $4+3+2=9$  the polarity of spirit

444hz  $4+4+4=1+2=3$  oscillating magnetic field (male spirit)

528hz  $5+2+8=1+5=6$  oscillating magnetic field (female spirit)

Was the Coliseum and many of the great Pyramids actually places of song and worship. Were these resonance devices that harvested energy?

The Tesla coil was modelled on the same design principles as a pyramid.

The coliseum from above looks like a giant computer chip. And the huge pillars could be tuned and used to enhance sound resonance.

Just as the cathedrals are designed to amplify and generate more sound to the heavens. We are now discovering that many advanced ancient races combined science, with art and music to produce power.

## **Anxiety medication vs 432hz music**

Anxiety medication common side effects:

- nausea
- headaches
- sweating
- dizziness
- more anxiety!
- agitation,
- weight gain
- dry mouth
- sexual disfunction.

Side effects listening to 432hz tuned music:

- bliss
- flow state
- harmony with nature
- improved sleep
- calm mind
- heart centred
- clarity

## **Music for aggression, anxiety, panic attacks and trauma**

Both animals and humans can also benefit from the calming state that 432hz music brings forth.

432hz music can assist greatly with panic attacks associated with trauma. Trauma can come from both in this life and also can be carried over from past lives and ancestral wounds. By reaching a chakra aligned flow state it is easy to begin to relax and breath deeply.

When relaxing to 432hz music ones heart and mind can connect, and a person becomes more rational and logical so they will not feel as overwhelmed.

The creative right side of the brain also kicks in. This may result in more inspiration and drive, and the focus to pursue a healing hobby, or positive pursuit may kick in over the feelings of frustration, pain, or overwhelm.

By relaxing, working, or whilst in transit when listening to 432hz music ones body can reach a flow state. They become less likely to lash out or become agitated or aggressive as 432hz music brings a calm state over ones whole being.

Panic attacks can be supported in the same manner as will any other symptoms of trauma. Once the body is relaxed with 432hz music many emotional triggers and trauma symptoms can be managed much more effectively.

### **Music and brain function**

Music has magical effects on sufferers of degenerative brain issues associated with ageing. And music therapy can also work remarkably well on patients with dementia.

60 Stroke patients in Finland were subjected to a music therapy trial in 2011.

The Finnish study found the patients to have vastly improved recovery rates when they were given access to music as cognitive therapy.

Other research has also shown that patients suffering from loss of speech due to brain injury or stroke regain it more quickly by learning to sing before trying to speak. And singing can help with many speech disorders too.

This phenomenon of music facilitating healing in the brain after a stroke has been coined by the term “the Kenny Rogers effect” as Kenny Rogers was one of the more favoured artists to listen to by the stroke patients in the study.

Listening to enjoyable music also increases dopamine effects on the brain, and experimental drugs have previously been used on stroke patients to boost dopamine levels.

Study co-author David Soto, an Imperial College London neuroscientist said "When emotional areas light up and are activated, the attentional system seems to be more effective as well."

He believed that increased releases of dopamine, which is an emotion-regulating neurotransmitter, may be responsible. Soto is also quoted as saying "It may lead to an increase of neural resources in these critical damaged brain regions"

## **Music to aid in surgery**

Relaxing 432hz tuned music could also aid patients and doctors and surgeons when performing both minor and complex surgery procedures.

According to a study published by the National Institute of Health, "Music effectively reduces anxiety for medical and surgical patients and often reduces surgical and chronic pain."

Music appears to exert direct physiologic effects through the autonomic nervous system. It also has indirect effects by modifying caregiver behaviour.

Music effectively reduces anxiety and improves mood for medical and surgical patients, for patients in intensive care units and patients undergoing procedures, and for children as well as adults.

Music is a low-cost intervention that often reduces surgical, procedural, acute, and chronic pain. Music also improves the quality of life for patients receiving palliative care, enhancing a sense of comfort and relaxation.

Providing music to caregivers may be a cost-effective and enjoyable strategy to improve empathy, compassion, and relationship centred care while not increasing errors or interfering with technical aspects of care.

## **Music for higher crop yields**

Resonance frequencies combined with the nature's laws aligned state of 432hz tuning could potentially increase crop yields in commercial and residential applications.

Within small off-grid homes utilising permaculture music frequencies to optimise food yield and growth time could maximise the small spaces allocated for planting.

Many farmers use classical music to increase crop yields. It could be most beneficial to undertake controlled testing to see if crop yields are improved by playing the plants music set in these magical tunings like 432hz, benchmarked against a crop yield subjected to 440hz classical music, or no music at all.

As with commercial farming for an ever increasing world population, higher yields, and increased grow times using resonance frequencies and 432hz music could potentially save billions of dollars and feed billions of people.

## **How can you harness the power of 432?**

Can you now see how magical tunings make up all that is?

They are a vital tool for any healer to utilise in harmony with their modality.

They hold the secrets to many advancements in our sciences.

They hold upgrades to our evolution as a species.

They can shift and shape, create and destroy.

One must simply tune in.

## Beyond 432

### Schumann tuning

Schumann frequency refers to the vibration of our earth and its atmosphere. The Schumann frequency of the earth currently sits at 7.83hz which would make the tuning for musical instruments in relation to this frequency at A= 430.65hz.

Note how close this tuning is to 432hz. Only 1.35hz in difference and in vortex math, and  $1+3+5 = 9$ .

Again 430.65hz in vortex math also comes back to the magic number 9

430.65hz is  $4+3+0+6+5=18$

And  $1+8=9$

### Beethovens tuning fork

In 1803 Beethoven gave the violinist George August Polgreen Bridgetower a tuning fork as a gift. Bridgetower gave the very first performance of Beethoven's Kreutzer Sonata for which the composer himself played the piano.

Beethoven's tuning fork that is kept in the British museum resonates at 455.4hz.

Let's have a look at this tuning as it relates in vortex math:

$4+5+5+4 = 9$

### 111hz celular regeneration frequency

Studies show that 111hz produces endorphins in the body which in turn will ease pain and give the body and mind an overall feeling of well being.

As well as increasing overall feelings of well-being, 111hz can have positive effects on increasing empathy in humans, and improves both focus and memory.

The Hypogeum of Hal-Saflieni in Malta is an underground temple (Hypogeum) carved into rock that resonates at 111hz.

Studies of MRI brain scans show that at 111hz the brain turns off the prefrontal cortex which is responsible for language the brain switches over temporarily to the

right side which controls our creativity, intuition, and brings one into a state of transcendental meditation.

In the tuning of A4 = 444hz (also known as “Angel tuning”), A2=111hz which is also the open A string (second lowest string) on the guitar when also tuned to A=444hz.

## **The Om frequency**

Two most powerful words used throughout our known history to create and manifest are Om and Amen.

Om is the sound of our universe in just two letters. It has been referred to as the word that when spoken will enter other dimensions. Amen is a word more known by Christian faiths to mean “so be it” or “it is so”, however the meaning comes from the Hebrew word *āmēn*, meaning certainty and truth.

Both words are most effectively voiced at 136.1hz known as “the Om frequency”. The Om frequency  $1+3+6+1$  is master number 11, and also then number 2.

Tuning forks have been made in this pitch to tune the drone sound of a traditional instruments like Sitar. The Om frequency of 136.1hz can be used most effectively when focusing on a desired outcome or manifestation when in heart-space mediation.

## **Solfeggio Frequencies**

### **174hz**

Great for pain relief 174 Hz is a powerful sonic anaesthetic.

174 Hz is also the preferred tuning fork for biofield work, which involves re-tuning the biofield which surrounds the body and finding stuck energies and traumas.

Traumas can become compartmentalised in the human biofield and by finding them, and shifting them back to the body we are reintegrating these experiences to heal and learn from.

### **285hz**

The reviving, re-organising sound of 285 Hz.

This frequency communicates with the body to restructure and repair itself.

285 hertz enables healing in the body to speed up, and also by rejuvenating tissue. It also helps to strengthen the immune system.

So whether the patient has cuts or burns, fractures, sprains or breaks, or needs tissue or organ regeneration, or has respiratory or breathing issues this frequency is beneficial.

### **396 Hz**

For aid in depression, anxiety, bi-polar, schizophrenia, autism and ADHD this frequency could really be the answer.

The frequency of 396hertz has 3 main benefits:

- 1/ It uplifts ones spirit
- 2/ gives a feeling of control
- 3/ gives one a sense of security

396 Hz can aid to remove subconscious fears, worries, and anxiety. It also helps to eliminate feelings of guilt and subconscious negative beliefs.

If personal goal setting and the desire to achieve something is strong this tuning can also be extremely beneficial.

## **417 Hz**

417 can help with integration of upgrades and to facilitate change. This frequency also helps with dealing with trauma and anxiety.

It can also assist by removing negative self talk and emotions, and can also assist with the pain and heartbreak caused by traumatic events.

This is a great solfeggio tuning for those who are prone to self criticism, being judged or feelings of unworthiness.

## **528 Hz**

528 Hz is the frequency of love, and the rainbow, it is also the frequency to restructure water and to strengthen and activate cells and our DNA.

528 hertz when played at 80 decibels is shown to reduce cell death in alcoholics by 20%. It is also studied to increase the virility in cells and the body's immune response via increasing the reactive oxygen species in the body by 100%.

93% of DNA is light and sound reception and transmission. 528hz is essentially upgrading and repairing our DNA and activating the waters in our body. Listening to 528hz music or the pure frequency of 528hz for as little as just 4 minutes has been found to reduce stress to both the endocrine system and the autonomic nervous system working with cortisol oxytocin.

528 hz is a C5 note in the base tuning of A4 = 444hz.

528hz can be used to structure water.

There is a saying that face of God is in water that is structured. In other words, water that is in correct vibrational tuning has seemingly magical healing, nourishing and vitalising powers.

To correctly structure water play 528hz near to water you would like to structure and tune. If a speaker or instrument is near to, or pointing toward the body or container of water then the sound waves can ripple through and retune and restructure the water effectively.

528hz has mother spirit energy as  $5+2+8$  is 6 in vortex math  
6 is the number of female spirit, and the number of mother earth.

To achieve the tuning of 528hz you can also tune your instrument to A=444hz (Angel tuning) and the note C5, or the 8th fret of the high E string of the guitar will sound out at 528hz.

As up to 60% of a human body is made up of water this tuning can also be most effective when played in meditation or whilst relaxing.

C1 (4 octaves below 528hz) is 33hz.

and C2 (3 octaves below 528hz) is 66hz.

## **639 Hz**

To enter a state of harmony, bliss and flow to allow in love, acceptance and understanding use 639hz.

An instant mood lifter 693hz can also help to regulate emotions.

639hz can also assist when working through big decisions, tasks in life, or relationship issues and affairs of the heart.

## **741 Hz**

If you want to activate the problem solving mechanisms of your psyche then 741 Hz is for you.

It also enhances the feeling of freedom to be creative and the freedom of self expression and also to speak one's truth thereby being connected to the throat chakra.

If you would like to become and live more healthy and to detoxify your body utilise this frequency. The same goes for the desire to live more pure and in touch with the earth.

## **852 Hz**

852hz can be utilised to feed and activate intuition, and to power up and cleanse and decalcify the pineal gland known also as the third eye. This frequency can be used to release negative thoughts and feelings and replace them with positive affirmations.

Another great tuning to play to those suffering from traumas, anxiety, depression, insomnia, adhd, autism, bi polar and schizophrenia.

## 963 Hz

Tuning of 963 can be summoned for divinity purposes.

963 Hz frequency can be most beneficial to someone who desires access to higher states consciousness and for those who are on an ascension path.

963 is good tuning to activate lightworkers and starseeds.

If one would like to get closer to reach a place of christ consciousness, or to walk the divine path this frequency could be most effective.

963hz tuned music or the pure tone of 963 will elevate the crown chakra and take one to higher states in both sleep and when awake. It is the highest of the solfeggio frequencies and will allow one to more easily tap into divinity and oneness.

The light aspects of 963hz are also especially beneficial for overcoming judgement and learning unconditional love, marrying light and love. And for the love and forgiveness of self, and others.

This tuning is also a 9, as  $9+6+3=18$  and  $1+8=9$ .
